Lock Tite Rod Saver

Our Patent Pending Lock Tite Rod Saver is the latest innovation for holding your rods and reels to the deck of the boat. It has a ratchet mechanism on the housing that will ratchet the webbing tight, locking it in place to eliminate rod bounce. Our ratchet mechanism has a safety feature built-in that will not allow over-tightening that could cause damage to the rod. It mounts in the gunwale and the webbing extends out 14", retracting from there. The webbing secures to the deck of the boat with an easy to attach, easy to release low profile mounting plate. The Lock Tite Rod Saver can be installed as a replacement to our competitor's using the same installation hole in the gunwale.

Model LTRS

Holds 6 to 7 Rods

UPC 0 82687 86490 8

Rod Saver Vertical Mount Rod Saver

Our Vertical Mount Rod Savers are constructed with EPDM rubber inserts to hold rods in a boat in a vertical application securing the rods horizontally. The EPDM Rubber is a very outdoor durable material that will resist UV rays and outdoor elements. They are designed to hold rods and reels in a crisscross manner to enable more rods and reels to be stored in a smaller space.

Model SM4 Holds 4 Rods

Model SM6 Holds 6 Rods

Model SM8 Holds 8 Rods

Rod Saver

Poly Rod Strap

The Rod Saver Poly Rod Strap is the best designed and highest quality of any rubber rod holding device on the market. These straps are molded of black polyurethane material that will retain its stretch and remain unaffected by sunlight and most chemicals. They will not lose their hold when wet, and they will not fade out. The Poly Rod strap is 14" in length, designed to hold 6 rods.

Model PRS Holds 6 Rods

Rubber Grip Paddle Buckle Transom Tie-Down

Step up from the traditional style Tie-Down to our new Rubber Grip Paddle Buckle Transom Tie-Down. The same easy to operate over-center buckle has a rubber gripping surface on the handle eliminating those sharp metal edges. It provides a much more comfortable feel while using the tie-down. While securing your boat, the rubber grip is contoured to fit nicely in the palm of your hand and angles out on the end making it easy to grab and release.

Rubber Grip Quick Release Transom Tie-Down

Our traditional Quick Release Buckle with a new feel. The Rubber Grip Quick Release Transom Tie-down was designed with comfort in mind. The rubber gripping handle eliminates those sharp metal edges. It also provides an indent with grooves to place your thumb on, while cranking the over-center buckle into place, securing your boat to the trailer. It is easy to release with the rubber gripping surface angled out, providing a place to grip, while releasing the buckle.

Rod Saver Flat Foot

Recessed Tray for Trolling Motor Foot Control

You love to fish, but find yourself stopping before you want, because of back pain. The new Rod Saver Flat Foot Recessed Tray for your trolling motor foot control is the answer. By allowing you to improve your posture, it reduces back pain, letting you enjoy fishing for longer periods. In addition you'll find the boat deck much less cluttered. No more tripping over the trolling motor foot control. The Rod Saver Flat Foot Recessed Tray comes in two sizes to accommodate both Minn Kota and MotorGuide trolling motors. The Rod Saver Flat Foot Recessed Tray is constructed of heavy duty, durable 1/8" aluminum and has a baked-on powder coat finish. It will install in any brand of boat and comes with easy to follow mounting instructions, cutting template, 2' of drain tube and stainless steel mounting hardware.
